## PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate (2026) with 8+ months of hands-on software development experience through internships and independent projects. Built and deployed full-stack, real-time, and AI-powered applications using React, Node.js, Java, PostgreSQL, MongoDB, and LLM APIs. Seeking entry-level Software Developer / Full-Stack / AI Engineering opportunities.

## EDUCATION

### Bachelor of Science in Computer Science 2023 – 2026

Pillai College of Arts, Commerce and Science, Navi Mumbai | CGPA: 8.01

## TECHNICAL SKILLS

**Frontend:** React.js, HTML5, JavaScript, Tailwind CSS

**Backend:** Node.js, Express.js, Java, Hibernate ORM, REST APIs, Socket.io

**Databases:** MongoDB, MySQL, PostgreSQL

**CS Fundamentals:** DSA, OOP, DBMS, Operating Systems, Computer Networks

**AI & Automation:** LLM API Integration, Tool Calling, Agentic Workflows, Prompt Engineering, Generative AI

**Other:** Git/GitHub

## EXPERIENCE

### Web Developer | BharatNest Industries Pvt Ltd Jan 2026 – Feb 2026

Internship · Maharashtra, India · Remote

- Developed and deployed the company's official website using React.js and Vite with a responsive desktop/mobile UI.
- Integrated WhatsApp customer communication and implemented basic SEO practices to improve search visibility.
- Collaborated directly with the founder to gather requirements, incorporate feedback, and deliver the project on schedule.

### Frontend Web Developer | NullClass Jul 2025 – Aug 2025

Internship · Navi Mumbai, Maharashtra, India · Remote

- Developed a modern stock market trading and simulation platform using ReactJS and Tailwind CSS.
- Integrated real-time market data for Nifty 50, Sensex, and Bank Nifty with simulated buy/sell orders and portfolio tracking.
- Built responsive, reusable UI components with market news, dynamic stock sections, and Framer Motion animations.

## PROJECTS

### AI File Explorer – AI-Powered Codebase Assistant/RepoPilot

React, Tailwind CSS, Node.js, Express.js, Groq API, Qwen3.6-27B

- Built an AI-powered codebase assistant that analyzes project files and answers developer queries using LLM tool calling.
- Implemented repository tools for file listing, code search, and targeted file reading, enabling the agent to retrieve relevant code before generating responses.
- Integrated Groq API with Qwen3.6-27B to implement multi-step agent workflows and tool-based codebase analysis.

### Arcane – Real-Time Chat Platform March 2026 – May 2026

- Architected real-time messaging with Socket.io/WebSockets — instant delivery, typing indicators, and live online status.
- Built a Connection Request Gating System with Node.js/Express and MongoDB; restricts DMs to accepted peers only.
- Secured auth with JWT and Bcrypt; protected API endpoints and client routes via custom ProtectedRoute components.

### BuildNet – Full-Stack Professional Networking Platform [BuildNet](#) Nov 2025 – March 2026

- Built a full-stack professional networking platform using React, Node.js, and PostgreSQL.
- Implemented Clerk authentication, Strapi CMS content management, and author–post relationships.
- Designed a responsive mobile-first UI and independently deployed frontend and backend to production.

### Notes Manager Application – Java & Hibernate ORM August 2025 – Sep 2025

- Built a CRUD note-management application using Entity–DAO–Service architecture, Hibernate ORM, HQL/Criteria queries, and transaction management.
